Project Overview

Inland Paperboard and Packaging Inc., submitted a DEC-2, Notice of Intent to Use Discrete Emission Credits, on April 30, 2004. The company is seeking to use NO_x discrete emission credits for alternative compliance with the ESAD of 30 TAC 117 for two boilers at their Orange Linerboard Facility. The intent to use is for the period from May 1, 2004 to May 1, 2005.

This is a similar intent to use the company previously submitted on March 13, 2004, for the use period from May 1, 2003 to May 1, 2004. (Project # 96466)

Discrete Emission Credit / Emission Reduction Credit Use

Inland Paperboard and Packaging Inc, operates two boilers at their Orange Linerboard Facility. The company is seeking to use DERCs for two boilers, FINs P-POWB and P-PKGB. The boilers are subject to ESADs listed in 30 TAC Chapter §117.206(a) as of May 1, 2003. The boilers are required to make a two thirds reduction required by 117.206(a) either by the total number of units required to reduce emissions or the total amount of emission reduction required. The company has elected to make the two-thirds reduction based on the total amount of emissions reduction required. Both boilers are authorized under Permit No. 9654A. This intent to use does not exceed the permit allowables.

The company estimated the discrete emission credits needed based on historical level of activity and emission rate. The company operates the two boilers year round. Based on the historical activity, the highest emission rates recorded are 0.113 lb/MMbtu for P-POWB and 0.137 lb/MMbtu for P-PKGB. The company estimates that there is a possibility that the boilers would operate at this rate 4 months, 120 days, out of the year. Thus the intent to use is for the days that boilers are operating above the ESAD level of 0.10 lb/MMbtu. However, since the company is only required to make a two-thirds reduction the total amount needed for a year is only 12.3 tons for both boilers. (see sample calculations). Including the 10% environmental contribution and 5% compliance margin, the total amount of discrete emission credits need will be 14.2 tons

Conclusion:

Inland Paperboard and Packaging Inc has accurately calculated the amount of discrete emission credits for alternate compliance with the ESADs listed in §117.206(a) for boilers P-POWB and P-PKGB . The company should be approved for the intent to use 14.2 tons of NOx discrete emission credits for the period of May 1, 2004 through May 1, 2005.

Dear Mr. Farris:

This letter is in response to your Form DEC-2, entitled "Notice of Intent to Use Discrete Emission Credits," dated April 30, 2004, for the compliance Title 30 Texas Administrative Code § 117.206(a)(1) [30 TAC § 117.206(a)(1)] for the period of May 1, 2004, through May 1, 2005. We understand you plan to use 14.2 tons of nitrogen oxides discrete emission credits for the purposes of complying with emission specifications for attainment demonstration for boilers in 30 TAC § 117.206(a)(1).

We have reviewed your application and have found that the notice and the credits to be used meet the requirements of 30 TAC §§ 101.370 through 101.379. A Form DEC-3, entitled "Notice of Use of Discrete Emission Credits," must be submitted within 90 days of the end of the use period.

Please reference the regulated entity number (RN) and customer reference number (CN) noted in this document in all your future banking and trading correspondence.
