RE: IACX Energy, LLC – Wellman, TX facility
Cancel Permit by Rule Registration due to Plant Shutdown

CN 1064162-792
RN 106552391
106957

To Whom It May Concern

IACX would like to notify the Texas Commission on Environmental Quality (TCEQ) of the plant shutdown of the authorized installations at the IACX Energy, LLC Wellman, facility (IACX) in Terry County, Texas. IACX would like to retract the Permit by Rule (PBR) registration submitted to TCEQ on November 2, 2012 for the proposed installations. In addition to internally documenting authorization for the facility's emissions at the Wellman site under PBR 106.4, 106.352, 106.492, and 106.512 requirements, IACX also registered the 325 hp Caterpillar G3406TA with the Core Data Form, Form PI-7, Table 29, and associated registration fee in accordance with PBR 106.512 requirements.

The IACX Wellman plant was decommissioned on May 12, 2014 and all equipment is disconnected and will be removed off-site. At this time, IACX would like to cancel the site's PBR. Although currently IACX does not plan to reopen the plant, IACX understands that if the plant were to reopen in the future, IACX would need to reapply for appropriate permitting and registrations as if the plant were a new installation. In addition, with the shutdown of the facility and cancellation of the PBR, IACX will no longer be subject to 40 CFR 63 Subparts HH and ZZZZ applicability and requirements.

If you have any questions or concerns, please contact me at (972) 960-3219.

Sincerely,

Jeff Lee
