**RE: Registration Void Request
U.S. Galvanizing, LLC – Plant No. 1608
5731 FM 1346, San Antonio, Texas
CN603973793; RN101041044
NSR Permit 7320; Registration 40065**

Enclosed is TCEQ Form 20569 NSR Air Permit Registration Void Request for the above referenced facility.

The registration for the two facilities registered was initially issued on January 12, 1999. In the 1999 NSR Permit 7320, the two registered facilities were permitted, but operated per the criteria of standard exemptions 106.452, Outdoor Abrasive Cleaning and 106.474, Hydrochloric Acid Storage. The 2005 permit renewal form PI-I dated June 6, 2004 indicate the two facilities are associated with the NSR Permit 7320 and it was noted the facilities were "rolled in 12/28/98 amendment." The current permit, dated February 2, 2005, provide operational limitations, recordkeeping requirements and maximum allowable emission rates for the two registered facilities.

With this information is believed the PBRs registered under registration number 40065 have been fully incorporated into the permit and request the original authorization be voided.

A copy of the above mentioned documents are for review.
