Re: Company Name Change of Air Quality Permits and Registrations

Our records indicate that the Clark Booster Station, RN100214865, Permit Number 53337 already exists in the new company name. Also our records indicate that no permit is attached to the Parsell Compressor Station, RN102421070, however, the new company name change has been made for the site.

We understand that there will be no change in the type of pollutants emitted and no increase in the quantity of emissions. As the new permittee of the facility, you have committed to maintain compliance with all air quality regulations of the Texas Commission on Environmental Quality (TCEQ) and the requirements of this permit at all times.

If you are a Title V federal operating permit holder, Title 30 Texas Administrative Code § 122.211 requires that changes to the permit identification of ownership or operational control of a site are an administrative revision to the permit. Such changes must be facilitated by a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the old and new permit holder. This written agreement must be maintained with the permit

In order to facilitate the administrative revision, please submit the following forms: OP-2 and OP-CR01. Also, make sure the information requested on form OP-1 sections I; II A and B; and VI is submitted in the revision application along with an indication of permit responsibility, coverage, and liability between the old and new permit holder.

Any questions regarding the administrative revision to the federal operating permit may be directed to Mr. Bernard Tupa at (512) 239-1150.

Thank you for informing us of this permittee change. If you have any questions regarding this letter, please feel free to contact me at (512) 239-4797.

Sincerely,

Brenda O'Brien
Air Permits Initial Review Team (MC-161)
