Re: Sealant Bulk Tank and Day Tank
Daingerfield, Morris County
Account ID No. MS-0003-S

Dear Mr. Overstreet:

This is in response to your permit by rule, Form PI-7, concerning the proposed installation of two tanks at your facility located in Daingerfield, Morris County. We understand that the 10,500 gallon tank and the 120 gallon tank will both be used to store hot asphalt. Emissions are estimated to be 0.77 tons per year of particulate matter and 0.15 tons per year of volatile organic compounds.

After evaluation of the information which you have furnished, we have determined that your proposed installation is authorized under 30 Texas Administrative Code (TAC) Section 106.472 if constructed and operated as described in your registration letter. This permit by rule authorized by the Texas Natural Resource Conservation Commission (TNRCC) pursuant to 30 Texas Administrative Code Chapter 106.

A copy of the permit by rule in effect at the time of this registration is enclosed. You must construct, install, or modify facilities in accordance with the version of the permit by rule in effect when construction, installation or modification actually begins (see 30 TAC 106.4(a)(5)). After completion of construction, installation or modification, the facility shall be operated in compliance with the all applicable conditions of the claimed permits by rule and 30 TAC 106.4.

You are reminded that regardless of whether a permit is required, these facilities must be in compliance with all rules and regulations of the TNRCC and of the U.S. Environmental Protection Agency at all times.

Mr. Larry Overstreet
