Description of Overall Unit: Storage tanks and heater

Description of Facilities/Processes Claimed in this  
Registration and Exemptions Claimed: The applicant lists 12  
storage tanks and one natural gas fired heater in this claim.  
He has provided no process description. The company claims  
STDX 51 for the tanks and 7 for the heater.

Sources, Emissions and Control Summary: The applicant lists  
one 1 MM gallon tank, six 225 M gallon tanks, three 500 M  
gallon tanks, one 450 M gallon tank, and one 700 M gallon tank.  
He shows their contents as "used oil", but does not specify  
what category in STDX 51 these pertain to. He also needs to  
discuss the site as a whole and the status of these tanks and  
heater prior to this claim. Since VOC emissions exceed 5 tpy,  
he needs to discuss the applicability of NNSR and netting.

Emissions Reductions due to NSR: Not yet determined

Requires PSD or Nonattainment Netting? Undetermined

Does Not Meet All General and Specific Conditions.
