NOTES:

Mr. Hargraves,

To follow are the proposed revisions to Permit HW-50212 as we discussed today and on October 8, 1996.

The language you request to be added to the permit concerning container to container transfers will read as follows: "Container-to-container transfers of untreated waste material shall be prohibited, except as authorized by this and other provision(s). **Solid or solidified** waste material may be transferred from one container to another only in the truck wash building in a manner so as to minimize the spillage or leakage of waste materials from the containers..."

Concerning sampling of containers, Provision III.K.9.c. will read: "Opening of drums and/or other containers for sampling, inspection, and/or decanting at facility unit no. 46, **except those containing only bulk solids**, shall occur in controlled spaces designated for such operations with air sweeps or purge systems specifically designed to manage the potential air contaminants of those spaces. Emissions captured by this system shall be processed by a thermal oxidizer system or other approved alternate emission control system."

Once I receive your approval of these revisions I will forward my comments to Billy Spiller. Please call me if you have any questions. Thank you.

Angel Tomasino
