Re: Aluminum Foundry
Denison, Grayson County
Account ID No. GI-0030-C

Dear Mr. Wilbur:

This is in response to your exemption registration, Form PI-8, concerning the proposed installation of a natural gas-fired aluminum melt furnace in Denison, Grayson County. We understand that you will replace the existing Melt Furnace No. 7, identified in Permit 214 A as Emission Point No. 3G and located in Building 3908, with a new smaller furnace having a bath capacity of 6,000 pounds.

After evaluation of the information which you have furnished, we have determined that your proposed installation is exempt from permitting procedures under Standard Exemption 111 if constructed and operated as described in your registration request. This standard exemption was authorized by the Executive Director of the Texas Natural Resource Conservation Commission (TNRCC) pursuant to §116.211 (Regulation VI). A copy of the exemption in effect at the time of this registration is enclosed. You must operate in accordance with all requirements of the enclosed standard exemption.

You are reminded that regardless of whether a permit is required, these facilities must be in compliance with all rules and regulations of the TNRCC and of the U.S. Environmental Protection Agency at all times.

Your cooperation in this matter is appreciated. If you have any questions concerning this exemption, please contact Mr. Dois Webb of our New Source Review Division at (512) 239-1575.

Sincerely,

Gary I. Wallin, P.E.
Manager, Mechanical Section
