Re: Boiler Replacement
Odessa, Ector County
Account ID No. EB-0038-F

Dear Joe Cumbest:

This is in response to your letter dated November 2, 1993 concerning the proposed installation of a 9 MM BTU per hour boiler to replace an existing boiler at your Odessa Facility. After evaluation of the information which you have furnished, we have determined that your project is exempt from the permit procedures under Standard Exemption No. 7 if constructed and operated as described in your letter. This standard exemption was previously authorized by the Executive Director pursuant to Texas Natural Resource Conservation Commission (TNRCC) Rule 116.211(a), 30 Texas Administrative Code Section 116 (commonly known as Regulation VI). A copy of the exemption in effect at the time of this registration is attached. You must operate in accordance with all requirements of the attached standard exemption.

You are reminded that regardless of whether a permit is required, these facilities must be in compliance with all air quality Rules and Regulations of the TNRCC and of the U.S. Environmental Protection Agency at all times.

If you have any questions concerning this exemption, please contact Mr. Edward Rapier of our Office of Air Quality New Source Review Program.

Sincerely,

James E. Crocker, P.E.
Manager, Combustion Section
New Source Review Program
