Re: Permit Amendment
Permit No. 3687 and PSD-TX-9
Coleto Creek Power Station
Fannin, Goliad County
Account ID No. GF-0002-R

Dear Mr. Early:

This is in response to your letter dated May 6, 1994 and permit application, Form PI-1, concerning the proposed amendment to Permit No. 3687. We understand that you propose to add Powder River Basin coals to those authorized for this station and construct additional coal and ash handling facilities.

Pursuant to Texas Natural Resource Conservation Commission (TNRCC) Rule 116.116(a) of Regulation VI, Permit No. 3687 is hereby amended. This information will be incorporated into the existing permit file. Enclosed are revised special provisions pages and a maximum allowable emission rates table. Please attach these to your permit and return the previously-issued provisions to this office.

This amendment will be automatically void upon the occurrence of any of the following conditions:

1. Failure to begin construction of the changes authorized by this amendment within 18 months from the date of this authorization.
2. Discontinuance of construction of the changes authorized by this amendment for a period of 18 consecutive months or more.

3. Not completing the changes authorized by this amendment within a reasonable time.

Mr. Ronald R. Early

Page 2

We have enclosed two operations certification forms (Form PI-3A and Form PI-3B). TNRCC Rule 116.110(b) of Regulation VI requires you to certify that operations addressed in this permit are in conformance with representations in the permit application. Please file these certifications with both the TNRCC Austin New Source Review Program and the appropriate TNRCC regional office in a timely manner as prescribed by rule.

Your cooperation in this matter is appreciated. If you have further questions, please contact Mr. Skeet Payne of our Office of Air Quality New Source Review Program.

Sincerely,

Anthony C. Grigsby
Executive Director
Texas Natural Resource Conservation Commission
