

Surface Water Site-specific Criteria Determination

In order for site-specific surface water criteria to be generated by the Water Quality Standards Team for any remediation site the following information **must** be provided:

Project Identification Number (LPST ID): 121158

Project Name: Corrective Action Requirements for Frankie Carter Randolph Park

Name of TCEQ Project Manager: Emily Chen, P.E.

Contact Name: Teresa L. Beavers, P.E., Senior Environmental Engineer for HCED

Company Name: Harris County Engineering Department

Telephone: (713) 274-3612 Fax: _____

Mailing Address: 1001 Preston Street, 7th Floor

E-mail Address: Teresa.Beavers@eng.hctx.net

Physical Address of the Project Site:

5100 FM 2351, Friendswood, TX 77546

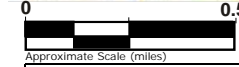

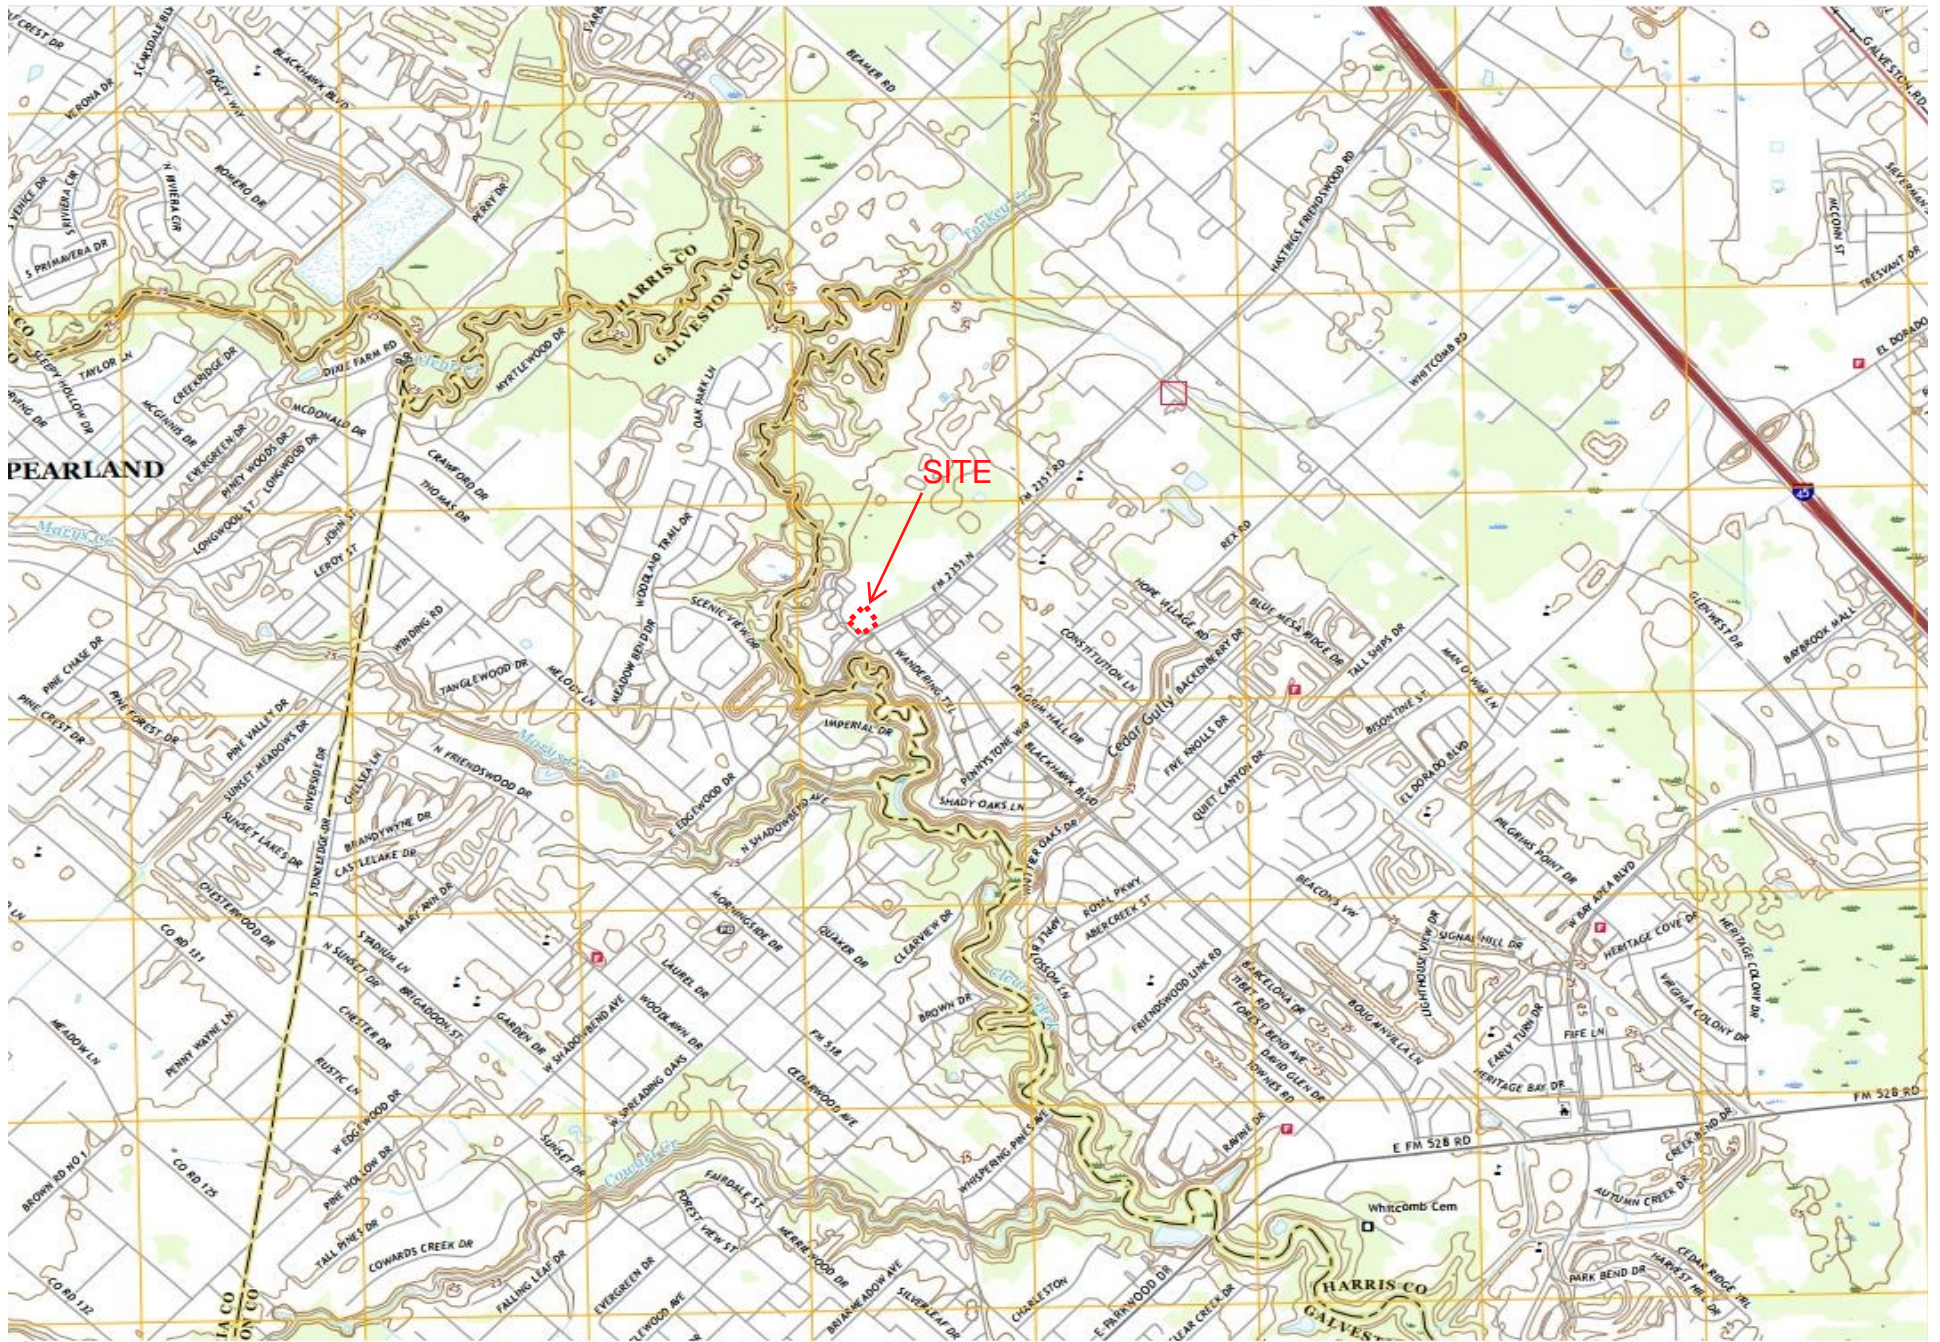

County of Project Site: Harris

Please enclose with this form:

1. USGS topographic maps depicting:
 - site location
 - the discharge route for three miles downstream of the discharge/seep location
2. A list of the chemicals of concern (e.g. benzene, toluene, lead).
3. Receiving surface water body information including:
 - Name of the immediate receiving water
 - Description of the immediate receiving water (stream, lake, etc.) and whether it is intermittent, intermittent with perennial pools, or perennial.
 - If treated water is to be discharged, please provide a description of the flow status downstream of the proposed discharge point.
 - Names of all perennial streams that join the receiving water within three miles downstream of the discharge or seep location.

Please provide any receiving stream monitoring data, if available.

Submit your request to: Standard Implementation Team (MC-150)
Water Quality Division
P.O. Box 13087
Austin, Texas 78711-3087

Chemicals of Concern (COCs) – Frankie Carter Randolph Park

Soil:

- Benzene

Groundwater:

- Lead
- Benzene
- Toluene
- Ethylbenzene

Receiving Surface Water Body Information– Frankie Carter Randolph Park

Name of the immediate receiving water:

- Clear Creek

Description of the immediate receiving water:

- Clear Creek is a perineal stream that has a continuous flow annually.

Description of the flow status downstream of the proposed discharge point:

- N/A

Names of all perennial streams that join the receiving water within three miles downstream:

- Mary's Creek
- Cowart Creek
