

**Electric Generating Unit Standard Permit
Technical Review
WITHDRAWAL**

Company	All Bunkering LLC	Registration Number	179229
City	Sabine Pass	Project Number	389169
County	Jefferson	Regulated Entity Number	RN112148861
Project Type	Standard Permit Application	Customer Reference Number	CN606355329
Project Reviewer	Celine Rosales	Project Received Date	February 20, 2025
Site Name	All Bunkering		

Project Description

All Bunkering LLC is proposing to build and operate the All Bunkering Facility in Jefferson County, Texas. The proposed facility is a liquefied natural gas (LNG) manufacturing plant (SIC 4925). The plant will continuously produce 0.44 million metric tonnes per annum (MTPA) of LNG in two trains (4 modules). All Bunkering is seeking an air construction permit to authorize the construction of the proposed ten (10) natural gas-fired electric generating engines. The electricity generated by these ten generators will be used by the on-site production equipment. Each generator has an output of 4.459 MW, with a total output for the site at 44.59 MW. There will be 10 generators in total, 9 of which will run simultaneously and 1 is on standby. All engines on site will meet requirements listed in NSPS subpart JJJJ and MACT ZZZZ.

Company requested withdrawal on March 19th, 2025 because the company wishes to apply for a case-by-case permit.

General Rules Check	Comments
Does the project trigger PSD or NA review?	Company requested withdrawal.
Is the facility taking an operational limit to meet the Standard Permit? If yes, describe how this project is not circumventing major NSR permitting. (30 TAC §116.110)	

Standard Permit Rules Check	Comments
Type of unit being authorized	Company requested withdrawal.
Fees	
Combined Heat and Power (if taking credit)	
Fuel	
NO _x emission limitation (in lb/MWh)	
Maintenance, Startup, and Shutdown
