Re: Registration Number: 141721
City: Barstow, County: Ward
Regulated Entity Number: RN109035477
Customer Reference Number: CN605077106

This is an acknowledgement that Brazos Midstream Operating, LLC has notified the Texas Commission on Environmental Quality (TCEQ) of the intent to construct new, or implement changes for, oil and gas production facilities at Miller Compressor Station under the Air Quality Standard Permit for Oil and Gas Handling and Production Facilities. Please use the registration number provided above when submitting the PI-1S standard permit registration or communicating with TCEQ in the future.

Be advised no review has been done by TCEQ to verify that the site meets the requirements of the standard permit. Within 90 days after start of operation or implemented changes (whichever occurs first), the facilities must be registered. Operations may continue after receipt of registration if there are no objections or 45 days after receipt by the executive director of the registration, whichever occurs first. It is the TCEQ's expectation that if a site properly submitted notification but once constructed does not qualify for this standard permit, the site must instead apply for a New Source Review case by case permit under Title 30 Texas Administrative Code (30 TAC) §116.110 and cease operation until the proper authorization is received.

As a reminder, regardless of authorization mechanism, all facilities must be in compliance and operate in accordance with all rules and regulations of the TCEQ and the U.S. Environmental Protection Agency. Records must be maintained in accordance with 30 TAC § 116.615.

This action is taken under authority delegated by the Executive Director of the TCEQ. If you need further information or have questions, please contact the Rule Registrations Section at (512) 239-1250 or write to the Texas Commission on Environmental Quality, Office of Air, Air Permits Division, MC-163, P.O. Box 13087, Austin, Texas 78711-3087.

Sincerely,
