34858	2151	138442	01/09/2025	BAILEY,ANN	5700 WONDER DR		FORT WORTH	TX	76133	3639	A.Bailey@TCU.edu	Dear Texas Commission on Environmental Quality, I am writing to oppose the proposed operating permit (No. O2151) for Chevron's Sweeny Old Ocean Complex in Brazoria County, Texas. The approval of this permit will exacerbate environmental and public health inequities in a community already overburdened by industrial pollution. The Sweeny Complex, located near the Phillips 66 Refinery, operates ethane crackers emitting significant greenhouse gases and air pollutants. These emissions contribute to extreme heat events, which threaten the health of outdoor workers, young children, and elderly residents. Moreover, the highly flammable materials used at this facility increase the risk of catastrophic accidents and explosions, endangering nearby populations. I urge the TCEQ to prioritize Brazoria County residents' health, safety, and well-being by rejecting this permit and holding Chevron accountable for its environmental impacts. Sincerely, Ann Bailey 5700 Wonder Drive Fort Worth, TX 76133	1

34858	2151	138442	01/14/2025	SCHULZ, HALEY	5838 BANYAN OAK CT		RICHMOND	TX	77407	1510	Hmgehring@yahoo.com	My name is Haley Schulz and I am a Fort Bend county resident and currently serve the public as an advocate and organizer with Public Citizen. I am formally requesting the TCEQ deny this permit to protect the communities, ecosystems and economy of Brazoria and beyond. Since this is for the federal operating permit which is only renewed once every 5 years, I wanted to reflect on the last 5 years. Between 2021 and 2023, the top 3 emissions from this facility were Ethylene, Benzene and propylene with over one million pounds of ethylene pumped out over that time. With long-term exposure to these emissions, you have respiratory and Central nervous system impacts, including damage to the brain. Benzene specifically is a well documented carcinogen, which exposure can lead to reproductive immunological and developmental damage. Compared to Texas and even the country, the community surrounding this facility shows a higher presence of heart disease, asthma, cancer, and even having a lower life expectancy. For those concerned with wildlife or the thousands of acres of estuaries here in Brazoria, both the San Bernard and Brazoria national wildlife refuges lay just over 16 miles away from this facility. These places of recreation and ecosystems are greatly impacted by chemical manufacturing facilities like this one and are not given nearly enough priority. The significant revision being proposed will ultimately result in increases of carbon monoxide, ammonia, sulfur dioxide, particulate matter, hydrogen sulfide, volatile organic compounds, and greenhouse gases. The permit does show a decrease in nitrogen oxide, which is nice except nitrogen oxide isn't reported to the EPA toxics release inventory program at this facility. I don't see how increasing your known top emissions but decreasing one lesser emission makes this permit in compliance. In the lifespan of the current FOP in place, the applicant has had some serious violations in compliance. Looking back to 2022 were high priority violations with the Clean Air Act. There were violations with the Clean Water Act continuously from Q3 2022 through fall of 2023. There were more violations with the Resource Conservation and Recovery Act and Safe Drinking Water Act back to 2022. The applicant paid the fees in penalties. But companies like Chevron Philips shouldn't be limited to just monetary penalties. There needs to be action, which includes transparency to the public on the installation of air monitors after the 2022 fine. The federal operating permit's purpose "is to improve overall compliance with the rules governing air pollution control by clearly listing all applicable requirements". Deny this permit and protect our most precious resource: our people.	1

34858	2151	138442	08/19/2024	JONES, GWENDOLYN LOLITA	126 COLEMAN DR		ANGLETON	TX	77515	9453	gwendolyn.jones58@gmail.com; climateconversationglj@gmail.com; gwendolyn.jones@gmail.com	I am concerned about the Chevron Sweeny Complex, Olefins, and NGL Assets that has permit O215 for review. According to the EPA's EJScreen, the area around this facility experiences 90-95% worse particulate matter than the nation and 95-99% worse Toxic Releases to the Air. Chevron has exceeded its pollution limits 44 times between 2019 and 2021 in Sweeny, TX. A settlement with the EPA and DOJ in 2022 requires them to implement an upgrade to their pollution controls and implement an air monitoring system in Sweeny. I want to know the status of this and have more questions for Chevron about their request to "significantly revise" their operating permit which would increase particulate matter and other harmful air pollutants. This will not only continue to degrade our health in Sweeny but also contribute to greenhouse gas emissions impacting our climate. This expansion will incur over 148 million dollars in climate-related social costs and potentially cause 177 climate change-related deaths. Sweeny is already a nonattainment area for Ozone, a catalyst for more extreme weather. We are still in the recovery process from Hurricane Beryl and need to understand the climate impact of this new permit. I own property in Sweeny that has been in my family for almost 100 years. Sweeny residents experience a high rate of cancer, asthma, and other illnesses that can be attributed to the surrounding industry. Chevron did not prove to be the best neighbor during Hurricane Harvey as both the Phillips 66 refinery and Chevron Phillips chemical plant blocked two bayous. After Harvey passed and the water had receded, 150 homes were flooded when the company stopped the temporary blockage they had installed. Please see attached the signatures of myself and my community members and our reasons for not approving this permit.	1
